1	ABSTRACT
2	
3	This invention relates to the diagnosis and treatment of cancerous diseases,
4	particularly to the mediation of cytotoxicity of tumor cells; and most particularly to the
5	use of cancerous disease modifying antibodies (CDMAB), optionally in combination
6	with one or more chemotherapeutic agents, as a means for initiating the cytotoxic
7	response. The invention further relates to binding assays which utilize the CDMABs
8	of the instant invention.
